DevOps Engineer with 10+ years of experience automating cloud infrastructure across AWS and Azure, specializing in Kubernetes, Terraform, CI/CD, and observability. Passionate about AI-augmented developer workflows and an avid Neovim user, always looking to integrate modern tooling to accelerate delivery and improve engineering quality.

EXPERIENCE

- Lead DevOps Engineer**Oct 2022 – Present
Digit88Bengaluru
 - Automated full tenant stack provisioning (secrets, databases, k8s apps, IDP, lambda APIs, data platform), reducing SAAS delivery time from 6 months to 1 week
 - Modernizing application which include standardizing configuration management, containerization, automating distributed systems
 - Performance tuning, helping developers to fine tune their applications system requirements
 - Maintaining SOC2 compliance
 - Incident management
- DevOps Engineer - II**Jan 2020 – Oct 2022
FabricBengaluru
 - Deployed production EKS cluster with Istio service mesh for HTTP and gRPC applications
 - Developed reusable terraform modules and owned the maintenance of terraform state of the platform
 - Provisioned disaster recovery environment for reliability excellence
 - Executing multi region environments and corresponding CICD configuration for multi-region deployments
 - Provisioned a unified observability platform with Grafana and Loki for Lambda applications, reducing average RCA time by 15 mins
 - Creation and maintenance of serverless platform using serverless framework using aws lambda and api gateways
- DevOps Engineer**Apr 2017 – Jan 2020
Olcabs ANI Technologies Pvt LtdBengaluru
 - Migrated mesos-marathon platform from AWS to Azure as part of Microsoft partnership using Terraform and Chef
 - Creation and maintenance of multiple high available ipsec tunnels between aws and azure for iterative microservice migration from aws to azure
 - Establishing a kong api gateway for efficient routing, migration and rate limiting across multiple cloud providers
 - Extended existing mesos-marathon infrastructure to migrate all assets of an acquired company
 - Private DNS cluster management using powerdns and bind
 - Creation and maintenance of observability platform using prometheus, grafana, newrelic, sysdig and hystrix turbine for circuit breakers
 - Developed utilities in python for various platform automations to reduce cost and time spent
- Sr Software Engineer**Apr 2014 – Apr 2017
Poornam Info Vision Pvt LtdKochi
 - Installation of various web, application and databases servers on bare metal linux servers from various data centers and aws ec2
 - Monitoring using zabbix and proactive server management
 - Linux server hardening and disaster recovery
 - Onboarding applications from bare-metal to public cloud providers like aws and gcp

SKILLS

Cloud & Infrastructure: AWS, Azure, GCP, Kubernetes, EKS, Istio, Terraform, Serverless Framework
Observability: Prometheus, Grafana, Loki, Newrelic, Sysdig, Zabbix
CI/CD & Automation: GitHub Actions, Jenkins, Chef, Python, Bash
Networking & Security: Kong API Gateway, PowerDNS, IPSec, SOC2 compliance, Linux hardening
Editor & Workflow: Neovim with LSP and custom plugin setup; enthusiastic about AI-augmented developer workflows using tools like GitHub Copilot and Claude to accelerate iteration and improve code quality

EDUCATION

- Nehru College of Engineering and Research Center**Thrissur, Kerala
B. Tech, Computer ScienceJul 2009 – Apr 2013
- Matha Nagar Public School**Ernakulam, Kerala
ISC,Jan 2009 – Jan 2009
- Matha Nagar Public School**Ernakulam, Kerala
ICSC,Jan 2007 – Jan 2007
